

U-GO ACCESS SALES SPECIFICATION SHEET

U-GO ACCESS

PART NUMBER: V11100

RAZOR DECK 2M

The U-Go Razor Deck is a lightweight yet robust low-level work platform that's easy to operate, saves time, reduces labour and minimises injury risk.

Designed to meet all relevant requirements of EN 1004:2004 and WAHR: 2005, the Razor Deck ticks all the boxes on risk assessments and is simple and safe to operate.

The compact, lightweight structure of the Razor Deck is effortless for one person to operate. With a unique folding design it takes the hard work of erecting a raised platform.

As a one-piece unit with no detachable parts to assemble or lose, Razor Deck is converted from 'flat-packed' to 'ready to use' in seconds. It's even compact enough to fit into a large estate car.
